

NACSOUND  for Sonance

NAC SOUND for Sonance

NACSound is an established Italian manufacturer of quality loudspeakers specializing in a range of omni-directional, ceramic loudspeakers that furnish rather than disfigure a room without sacrificing quality sound reproduction.

Omni-directional technology offers an exceptional sound quality no matter where the speakers are placed.

Created by top designers, the design is exclusive.

The enamelled porcelain encasing the speakers is attractive and keeps its shape over time guaranteeing a superior sound quality.

Versatility: the speakers can be suspended from the ceiling or placed on any surface (Zemi only).

The speakers are handmade ensuring fine attention to detail.

omni

design: F. Pellisari

Omni-directional NACSound technology with central reflector in wood.

The ceramic speaker is designed to be suspended and is available in a wide range of colors and finishes.

Technical specifications:

Impedance: 8 ohm

Power: 70W r.m.s

Efficiency: 86 dB

Weight: 15.9lb (7.2 kg)

Height: 33.9" (86cm)

Diameter: 7.1" (18 cm)

zemi

design: E. Frolet & F. Pellisari

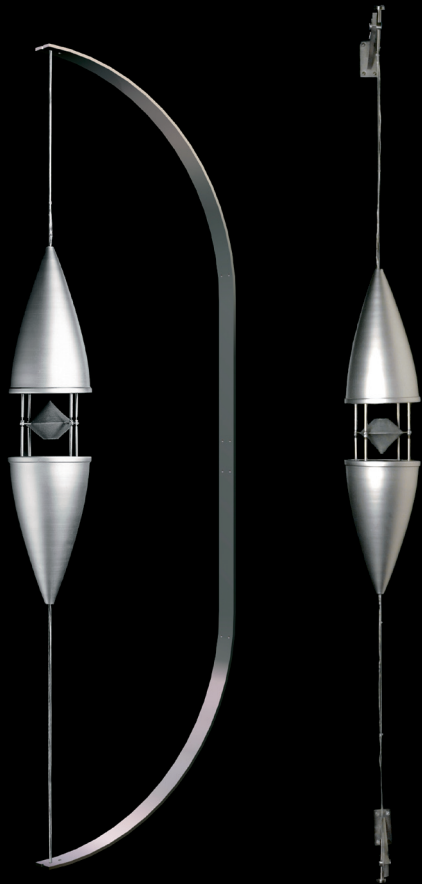

Multi-directional NACSound technology
(tweeter-woofer configuration that maximizes
sound production and clarity).

Available in both hanging and free standing
versions.

Technical specifications:

- Impedance: 8 ohm
- Power: 70W r.m.s
- Efficiency: 86 dB
- Weight: 10.4lb (4.7 kg)
- Diameter: 10.2" (26 cm)

kayak

design: D.Pinocci & F. Pellisari

Introducing the concept of a single-body speaker with stereophonic omni-directional emission.

It can be placed on any surface (wall, floor, ceiling, suspended horizontally, vertically or diagonally with its own matching aluminium Arc).

Technical specifications:

Impedance: 8 ohm

ordering information

NACSound for Sonance products are available only through Sonance dealers by special order. To find your local NACSound for Sonance dealer, contact the regional Sonance sales representative for your area at www.sonance.com/company/dealers

about NACSound

NACSound is the creation of Italian acoustic designer Francesco Pellisari. In 1992, while working as an industrial robot designer, he spent a month with Acoustic Research to follow his passion for acoustics. Once back in Italy, he struck out on his own and in 1995 established Acoustic Design, where he built his first speaker.

By 1997, Acoustic Design had become New Acoustic Concept (NAC), a company dedicated to manufacturing highly individualistic speakers without compromising audio quality. NACSound handmade speakers are now sold all over the world, but the company remains small and independent, dedicated to combining exciting design with high quality sound.
